and list of courses.

## Your Unique Degree

### Getting Started

You'll start your degree with a faculty advisor who will help guide you through the program. Then, you'll meet your peers in a freshman seminar class designed just for Environmental Science majors where you'll learn about the university and the opportunities for hands-on research, internships, and time-honored S&T traditions.

### Making the Most of Your Time

Throughout your time in Rolla, you'll take coursework across multiple departments and all three Missouri S&T colleges during your Environmental Science B.S. degree, then you'll have the opportunity to specialize or gain additional breadth when you work with your advisor to tailor your courses to your unique career goals. You'll have opportunities to study abroad, work with faculty on scientific research, get involved with the Ozark Research Field Station and participate in clubs such as Ecominers.

### Going the Distance

You'll finish your degree with an experiential capstone course where you interact with Environmental Scientists in a hands-on project-based setting. You'll also have the support of your advisor while you apply for jobs and access to resources such as Missouri S&T's giant career fair with over 300 potential employers. You'll also be able to continue your education in an accelerated M.S. or with a graduate certificate, both completable in 12 months or less.

For more information about the degree, checkout [envsci.mst.edu](http://envsci.mst.edu) or contact our program director, Dr. Robin Verble ([envsci@mst.edu](mailto:envsci@mst.edu) 573-341-7274) or contact Missouri S&T Admissions ([admissions@mst.edu](mailto:admissions@mst.edu)) to set up a campus visit.
